

Sourabh Jain

B.Tech — Computer Science & Engineering — 2027

9499176693 — sourabh.jain.23cse@bmu.edu.in

LinkedIn — GitHub — LeetCode — Portfolio

Education

BML Munjal University	2023 – 2027
B.Tech, Computer Science & Engineering	CGPA: 6.4/10
S.D. Public School	2021 – 2022
Class XII (CBSE)	69%
S.D. Public School	2019 – 2020
Class X (CBSE)	89%

Relevant Coursework

Data Structures & Algorithms, Object Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning, NLP

Technical Skills

Languages: C++, Python, JavaScript, Java, SQL, HTML

Libraries: NumPy, Pandas, Scikit-learn, OpenCV, Matplotlib, Seaborn

Tools: Git, GitHub, Postman, Karate DSL, Mockoon, IntelliJ IDEA CE

Concepts: Data Structures & Algorithms, REST APIs, API Testing, Test Automation, Feature Engineering, Regex Validation

Experience

Airtel Payments Bank (*SDE Intern – API Testing & Automation*) Jun 2025 – Jul 2025

Developed automated API test suites for Aadhaar, PAN and OTP services using Karate DSL, Postman and Mockoon, creating 40+ test cases and reducing manual testing effort by 40%.

Worked on AUA, KUA, KUA-OTP, and OTP banking APIs using REST architecture in IntelliJ IDEA CE.

Projects

AI Code Review Assistant Jan 2026 – Present

Developed a production-grade AI-powered code review platform using React, Node.js, Express, MongoDB, Redis and Gemini AI for automated code analysis and repository intelligence.

Implemented a Retrieval-Augmented Generation (RAG) pipeline with LangChain and ChromaDB, background job processing using BullMQ, and JWT-based authentication for secure code reviews.

Gridlock AI: Decision Intelligence for Traffic Management Jan 2026

Developed an AI-driven decision intelligence platform using Python, FastAPI, Streamlit, DuckDB, LightGBM and XGBoost to identify congestion hotspots and optimize parking enforcement.

Implemented route optimization, predictive analytics and resource allocation models with interactive dashboards for real-time traffic intelligence.

Air Quality Index (AQI) Analysis Aug 2025 – Dec 2025

Processed 50K+ AQI records across 12 cities using Python, Pandas and Matplotlib to analyze pollution trends, correlations and city-wise air quality patterns.

Performed data preprocessing, exploratory data analysis and visualization to generate actionable environmental insights from large-scale datasets.

Honors & Certifications

- Secured 1st Position – Track 1, EIS4.0 (Research & Innovation)
- Earned Python Programming Certification – Udemy (2025)
- Completed Web Development Certification – Mood Indigo, IIT Bombay
