

QA Intern — Functional & Accessibility Testing

Position: 01

Company: SecNinjaz Technologies LLP

Location: Delhi

ABOUT THE ROLE

We are looking for a motivated QA Intern who is eager to build a career in Software Testing. The intern will work closely with our QA team to perform Functional Testing, Accessibility Testing, and support activities related to STQC testing and compliance. This internship provides hands-on exposure to real-world projects, testing methodologies, and quality assurance processes.

KEY RESPONSIBILITIES

- Understand project requirements, business workflows, and functional specifications
- Prepare and execute functional test cases based on requirements
- Identify, document, and track software defects using bug-tracking tools
- Perform regression, smoke, and sanity testing
- Assist in Accessibility Testing based on WCAG 2.1 guidelines
- Verify application compliance using accessibility tools such as WAVE, axe DevTools, Lighthouse, and screen readers
- Participate in test planning, test execution, and defect verification
- Support QA documentation, including test cases, test reports, and checklists
- Assist the team in understanding and following STQC testing processes and documentation requirements
- Collaborate with developers, business analysts, and senior QA engineers to resolve issues
- Continuously learn new testing techniques, standards, and industry best practices

REQUIRED SKILLS

- Basic understanding of automation testing using Selenium or Playwright.
- Basic programming knowledge in Python for test automation and scripting.
- Basic understanding of Software Testing Life Cycle (STLC) and Software Development Life Cycle (SDLC)
- Knowledge of Functional Testing concepts
- Basic understanding of Accessibility Testing and WCAG guidelines
- Familiarity with HTML, CSS, and basic web technologies
- Strong analytical and problem-solving skills
- Good written and verbal communication skills
- Ability to learn quickly and work effectively in a team

PREFERRED SKILLS

- Knowledge of STQC testing standards and certification processes
- Familiarity with accessibility testing tools (WAVE, axe DevTools, Lighthouse, NVDA, JAWS, VoiceOver)
- Basic knowledge of API testing using Postman
- Basic understanding of SQL and databases
- Exposure to defect tracking tools such as Jira or GitLab

ELIGIBILITY

- B.Tech (Computer Science)

- Passion for software quality and continuous learning
- ISTQB Foundation certification (in progress or completed)

DESIRED QUALITIES

- Strong logical thinking
- Positive attitude and willingness to learn
- Good teamwork and communication skills
- Ability to manage tasks and meet deadlines
